

## **HOW DO I BECOME A CUSTOMER?**

The best way to become a customer is by clicking on the Shop button located throughout this site

## **WHAT IS AN AMBASSADOR?**

Zilis does not sell directly to consumers. Rather, all products are sold by Independent Representatives that we call Brand Ambassadors. They are the lifeblood of our company and can introduce you to our outstanding products.

## **HOW DO I BECOME AN AMBASSADOR?**

You may become a Brand Ambassador by expressing your desire to join to the person that introduced you to Zilis. You can enroll by simply clicking ["Join Now"](#).

## **WHAT IS ULTRACELL?**

UltraCell is formulated to support the health of the endocannabinoid system using the hemp plant. The Edge, Ice and Dream (known as boosters) are formulated to support the health of the endocannabinoid system using our proprietary Mimetix blend of all-natural, hemp-free botanicals. All products use our proprietary UltraCell technology to maximize bio-availability.

## **WHAT ARE THE DIFFERENCES BETWEEN ULTRACELL AND THE EDGE, ICE AND DREAM PRODUCTS?**

UltraCell is formulated to support the health of the endocannabinoid system using the hemp plant. The Edge, Ice and Dream (known as boosters) are formulated to support the health of the endocannabinoid system using our proprietary Mimetix blend of all-natural, hemp-free botanicals. All products use our proprietary UltraCell technology to maximize bio-availability.

## **CAN I GIVE THIS TO MY PETS?**

Yes. UltraCell is safe for pets as it does not contain harmful ingredients such as xylitol. For serving suggestions, please see the pet dosage chart published in the Ambassador Cloud.

## **WHAT IS THE CBD CONTENT?**

Each bottle of UltraCell contains 500mg of full spectrum hemp oil. In the same way that blueberries can vary in taste, color, and size, hemp oil can vary in CBD content, since it is a natural product. Generally, our CBD content is around 4.2 mg/ml of CBD per serving, but because it has a superior formula, it is up to 30 times more potent than traditional CBD oils.

## **DOES ULTRACELL CONTAIN ANY THC?**

The Federal Farm bill allows hemp-derived products to contain as much as 0.3 percent THC per dry weight. All batches of UltraCell are independently tested and verified at the time of bottling to contain less than 0.0% THC. Since UltraCell is derived from hemp, one should always assume there are trace amounts of THC in the product.
